■ Telegram YouTube Bot (token qo'shilgan)

1. Fayl: bot.py

```python
import logging
from aiogram import Bot, Dispatcher, executor, types
import yt_dlp

API_TOKEN = "8413429900:AAErkiKh7pAn5_b2-Ybbw6FF1PXrvIj5xEc" # ■
BotFather'dan olingan token

logging.basicConfig(level=logging.INFO)
bot = Bot(token=API_TOKEN)
dp = Dispatcher(bot)

@dp.message_handler(commands=['start'])
async def send_welcome(message: types.Message):
await message.reply(
"■ Salom!\n\n"
"■ Ushbu bot sizga YouTubedan:\n"
"— ■ Rasmlar\n"
"— ■ Videolar\n"
"— ■ Audiolar\n"
"— ■ Subtitrlar\n"
"■ Yuklab beruvchi eng tezkor bot\n\n"
"■ Yuklash uchun havolani yuboring:"
)

@dp.message_handler()
async def download_video(message: types.Message):
url = message.text.strip()

await message.reply("■ Yuklab olinmoqda, kuting...")

try:
ydl_opts = {"outtmpl": "video.mp4"}
with yt_dlp.YoutubeDL(ydl_opts) as ydl:
info = ydl.extract_info(url, download=True)

await message.reply_video(open("video.mp4", "rb"))
except Exception as e:
await message.reply("■ Xatolik: " + str(e))

if __name__ == '__main__':
executor.start_polling(dp, skip_updates=True)
```

2. Fayl: requirements.txt

```
aiogram
yt-dlp
```
